-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: - Page 13, Lines 8 and 10: The reference number 14 has been used to describe a reset node and a load.

Appropriate correction is required.

3. This application is in condition for allowance except for the following formal matters:

As noted above.

Art Unit: 2636

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

4. The following is a statement of reasons for the indication of allowable subject matter:

There have been methods to detect soft errors in microprocessors for some time, such as the one taught by **Jordan et al** [U.S. 6,785,847]. However, there is no method or device that consists of a plurality of concatenated latch units with comparators, a parity bit latch connected to the comparator of a last one of the plurality of latch units in conjunction with a parity bit comparator in communication with the latch and comparator of the last one of the latch units for detecting a parity bit-flip. This combination is considered novel and unobvious.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Richardson [U.S. 6,507,928] is a cache system with parity protection.

Jamil et al [U.S. 6,543,028] detects and corrects corruption of soft errors.

Quach [U.S. 6,640,313] is capable of operating in high reliability.

Jamil et al [U.S. 6,658,621] corrects soft errors in a next instruction pointer.

Batson et al [U.S. 6,760,881] combines refresh operation with parity validation.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John A. Tweel, Jr. whose telephone number is 571 272 2969. The examiner can normally be reached on M-F 10-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeff Hofsass can be reached on 571 272 2981. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
